ATC Foundation

Altamaha Technical College offers a wide variety of programs and career options. These programs and options provide our students with the skills and education needed to have a successful and rewarding career. The Altamaha Technical College Foundation is excited and proud to play a part in supporting such an outstanding academic institution.

Through the generous support of many contributors, the Foundation has been able to provide scholarships to many deserving students, help improve library services, and help provide state-of-the-art instructional equipment for classrooms. Thanks to all of those who have supported the Foundation with their contributions.

This is an exciting time for Altamaha Technical College. With an expanded service delivery area, the College has the opportunity to serve the needs of many more students, businesses, and industries along the Altamaha River and southern coast of Georgia. With this opportunity comes the need for even more support from the Foundation.

If you would like to contribute to the Altamaha Technical College Foundation and be a part of this excitement, please contact us today. Our Foundation is designated as a 501(c)(3) organization and your gifts are therefore tax deductable. But most importantly, your contributions will provide you the opportunity to be a part of making Altamaha Technical College the premier, regional center of higher education for learning, teaching, and building thriving communities.

Sincerely,

Doug Ellis
